

# LIVENGOOD®

**DISASTER/MCI**

Rapid, Mobile Deployment

- Mobile ER Capabilities.
- Provide ICU-Level Care Anywhere.
- Rapidly Deployable.
- Consolidate Equipment on a Single 2x2 Platform.
- Configurable for Any Non-Hospital Setting.

## Consolidates

### Patient Devices

8 Power Outlets  
2 Oxygen Tanks  
2 IV Poles  
IV Pumps  
Suction  
Chest Tubes  
Drains & Catheters

### Equipment

Monitor Defibrillator  
Computer  
Medication Lock Drawers  
Procedure Tray  
Bins and Baskets  
Ventilators  
Battery

Compatible with Mounting Systems from...

# LIVENGGOOD®

## DISASTER/MCI

Mass Casualty Incidents (MCI's) overwhelm existing healthcare resources necessitating patient-care areas to be established in non-hospital settings. Preparing a site for anticipated use is often prohibitively expensive complicated by the difficulty in predicting site accessibility during a disaster. Rapid deployment of a hospital-like setting is hindered by the bulk of equipment that is not designed for use outside of a hospital setting. A solution to manage and rapidly deploy patient-care equipment is required that maintains the same capabilities found at a hospital.

SK #00004 - Disaster/MCI

### ICU-Level Care... Anywhere

The Livengood Platform provides a solution for Disasters/MCI's that offers ICU-level capability on a mobile Platform readily maneuvered by a single person. Any location can instantly be transformed into patient care area while keeping medical equipment and supplies consolidated into a 2'x2' footprint. Designed specifically for this purpose, the Platform enables care givers to immediately begin providing hospital-level care.
