

# LIVENGOOD®

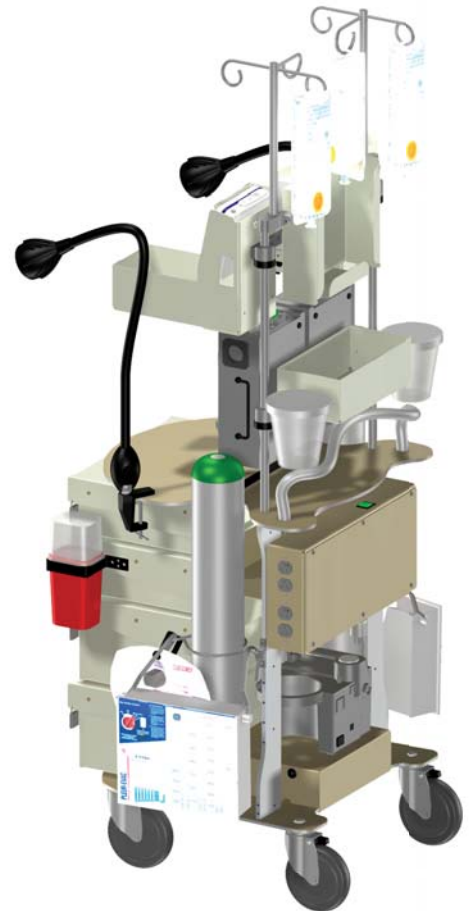

**EMERGENCY PREPAREDNESS - ICU Anywhere**

## Mobile Patient Care Environment (MPCE)

- Consolidate equipment & supplies in the immediate vicinity of the patient.
- Deploy by truck, ship or air without packaging - includes a durable protective tarp.
- Maximized density for transport - 2' x 2' with all free space packed with supplies.
- Maintains hospital-level safety standards - UL60601-1 & Joint Commission.
- Support multiple patients from a single MPCE.

### *Roll-Off-and-Go Deployment*

### *Immediately Transform Alternate Sites*

- *International Deployment* with US or local power systems.
- *Military Deployment* starting at Levels 2(FST) and 3(CSH).

Re-configure same MPCE for patient mobility at Levels 4 and 5.

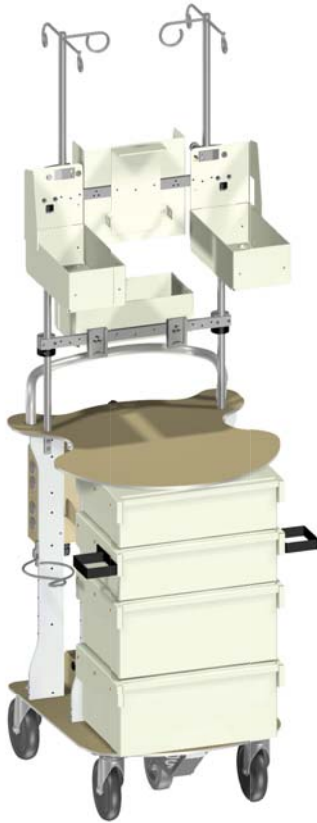

- Deploy with *Relief Missions* to ensure patient care environments for care
- Self-supporting structural stability in tents, hallways, conference rooms, etc.

# LIVENGGOOD®

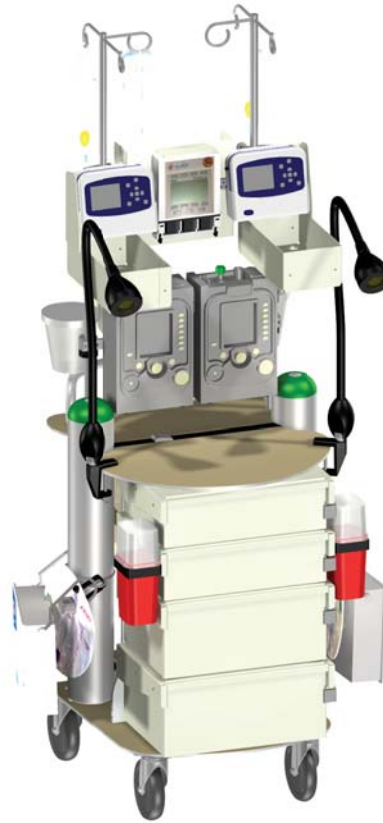

## EMERGENCY PREPAREDNESS - MCI/Pandemic

*Build from a base*

*Add mounts*

*Add Equipment*  
(Use existing equipment or packages available)

*Interoperable*

### Modular Configurability & Durability

The modular design allows for custom configuration with any patient equipment, from any country, including the flexibility to adapt to power configurations around the world. It may also be rapidly reconfigured for deployment on different missions.

### Preserve Hospital Standards in any Location

The entire Platform, not just the power source, is built to the rigorous standards of IEC60601 for use within 6ft of the patient and the ingress rating of IPX1. This ensures its durability, stability, water resistant and electrical safety. Don't compromise safety when *planning* for an event.

### Pre-Stocked Versions Available

Medical devices and supplies may be purchased for a complete out-of-the-box solution. Choose from a number of available options to match your needs. Contact a representative for a complete listing of options.
