## SURGE CAPACITY - EMERGENCY PREPAREDNESS

### *Mobile Patient Care Environment (MPCE)*

- Consolidates and Mobilizes an Entire Room with Remodeling
- Complies with Design and Operation Safety Standards
- Consolidates and Mobilizes an Entire Room

#### *ICU*

- Your ICU, Right Here, Right Now
- Transform Space without Remodeling
- Take control consolidate Resources and Staffing

#### *Emergency Department*

- Full Level of Care for Hallway Patients
- Expanded Headwall Capabilities using Existing System
- Rapid, Seamless Expansion for Mass Casualty Incidents

*Compatible with Mounting Systems from...*

## INTERIM FACILITY DURING CONSTRUCTION

### Emergency Preparedness Funding for New Construction

Construction creates a temporary need for surge capacity planning and alternate-site care. Instead of spending money on a temporary solution that will be lost, apply the money to Emergency Preparedness and receive a long-term benefit for a reduced cost.

**Configurable**

**Periop; ICU**

**Med/Surg; ED**

(Use existing equipment or packages available)

- **Create a hospital room environment anywhere**
- **Consolidate to increase patient capacity and gain space.**
- **Extend the reach of existing headwall**  
Connect to existing headwall to provide continuous oxygen and suction.  
Minimizes interim construction needs to maintain patient care.
- **Preserve UL and Joint Commission Compliance**  
Compliance is defined by the environment *NOT* the architecture. The MPCE makes this environment mobile and centered on the patient.
