Bins and Baskets
Ventilators
Battery

Compatible with Mounting Systems from...

GCX **HAFELE** **ERGOTRON**
INSTRUMENT MOUNTING SYSTEMS FINDING BETTER WAYS

LIFESPAN **RAM MOUNTS**

LIVENGGOOD®

SURGE CAPACITY

Surge Capacity is a challenge faced by hospitals every day. Disaster Planning does not generally account for the small sudden surges seen in day-to-day operation. As a result, Disaster Budgeting is appropriated to equipment that is either ineffective or unavailable for such surges.

SK #00002 - Surge Capacity

Disaster Budgeting for everyday patient care!

The Livengood Platform provides a solution for Surge Capacity that is mobile, immediately-available and consolidates patient supplies and equipment into a 2'x2' space. ICU-level care is made available to the patient regardless of patient location. Disaster budgets can be used to treat patients every day. The Platform can function equally as well in a Disaster/MCI situation providing a rapid, seamless solution for any incident.
