## WORK FLOW

### Point-of-Patient Care

- Increase Nurse-Patient Contact Time
- Locking Drawers For Medications, Supplies and Patient Belongings
- Consolidate All Carts Onto A Single Platform
- Decrease Staff Travel Time by Keeping All Patient Needs On The Platform
- Empower Patients to Ambulate with Fewer Staff
- Ergonomic EMR Interface at Patient's Side

### Consolidates

#### Patient Devices

8 Power Outlets  
2 Oxygen Tanks  
2 IV Poles  
IV Pumps  
Suction  
Chest Tubes  
Drains & Catheters

#### Equipment

Monitor Defibrillator  
Computer  
Medication Lock Drawers  
Procedure Tray  
Bins and Baskets  
Ventilators  
Battery

Compatible with Mounting Systems from...

**GCX** **HAFELE** **ERGOTRON**  
INSTRUMENT MOUNTING SYSTEMS FINDING BETTER WAYS

**LIFESPAN** **RAM MOUNTS**

# LIVENGOOD®

## Ambulation

Time and staff needed to ambulate a patient is greatly reduced. A single plug frees the patient from the wall. Staff is not required to push equipment or stabilize the patient. One staff member can accompany the patient if needed instead of 2 or 3.

## Computer

Powered docking station charges computer while providing an ergonomic point-of-patient EMR interface. Eliminates the need for battery stations.

## Consolidation

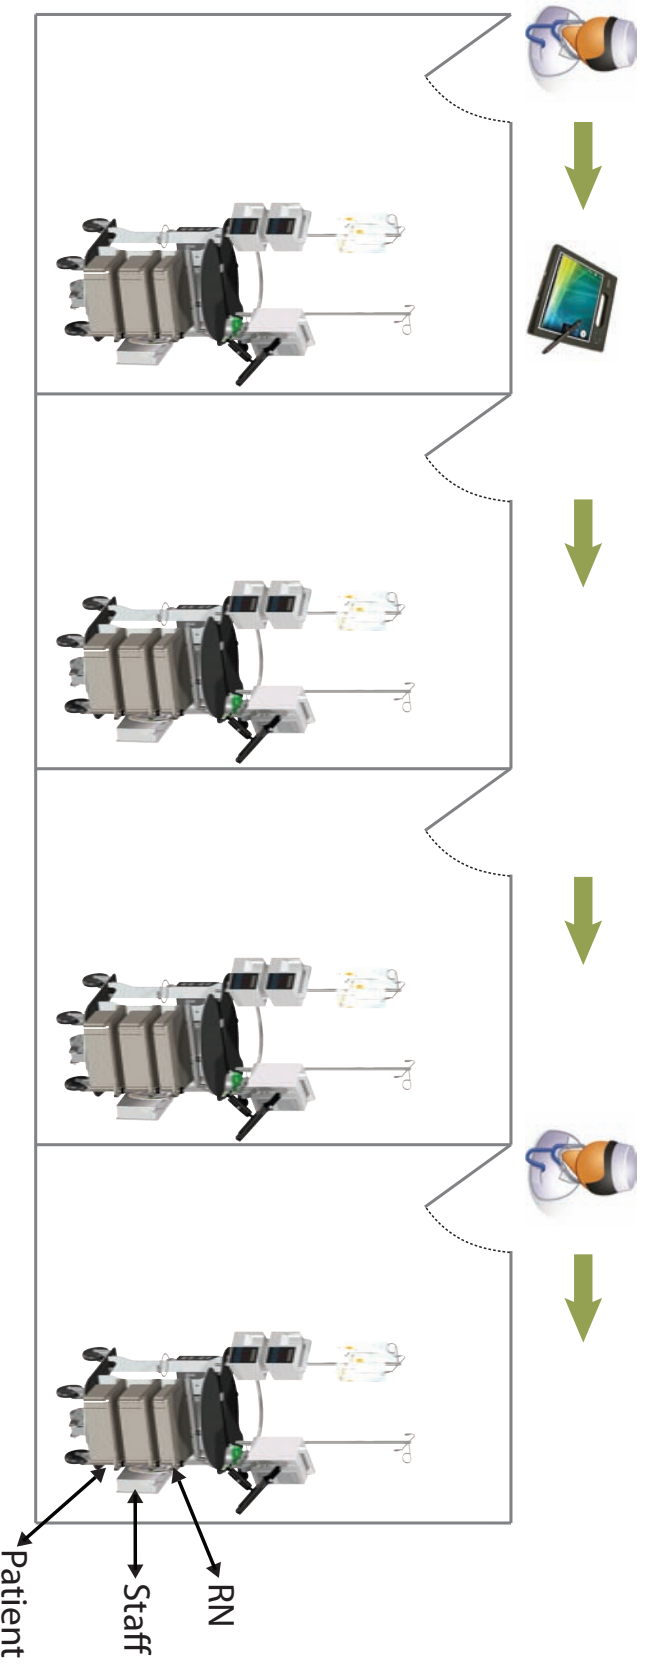

All the functionality of a computer, medication and supply cart on a Platform used by the Patient. Also gain the consolidation of IV poles, bedside stand, oxygen, suction and sites to hang catheters, tubes and drains.

## Drawers

Drawers with a changeable combo lock for medications, supplies and personal effects to stay with the patient. Set different levels of security for RN, staff and patient access on each drawer.

## Efficiency

Decrease staff travel and the need for carts.
